

Information Guide

Lethans Wind Farm

A new wind farm near Cumnock, East Ayrshire, that will generate up to 132 MW of electricity – enough to power more than 50,000 homes each year.

Scotland has some of the best wind resources in Europe. At OnPath Energy, we are harnessing that energy to help the UK transition to 100% renewable electricity. We are currently developing plans for a new wind farm in South Ayrshire, Lethans Wind Farm.

£7.1m

into a local
community benefit
fund over the lifespan
of the wind farm

£1.3m

skills and training
fund over the first
five years
of operation
